

WEBSITE REPORT

INTRODUCTION

This report outlines the key revisions and improvements required for the proposed company website. Two reference websites were previously provided to establish the desired direction — one representing our Printer Sales & Services business and the other representing our IT Solutions and Services.

As our company operates across both areas, the objective is to combine the relevant strengths, structure, and design elements of both references into a single website that accurately represents our complete range of products and services.

Following a review of the latest website demo, several important sections, features, and design elements require further revision or inclusion. This report highlights the **major changes and key requirements** that have to be addressed in the next revision. The development team may determine the specific implementation, layout details, and supporting design elements based on these requirements.

Reference Sites:

1. techno-agora.com
2. sosauh.com
3. trans-emirates.com

1. NAVBAR

Current Design

The current navbar consists of the logo on the left, with **Home, About, Services, Contact**, and the **Request Quote** button aligned to the right.

REQUIRED REVISION

*In the Top Utility bar, **add telephone** number (02 633 3364).

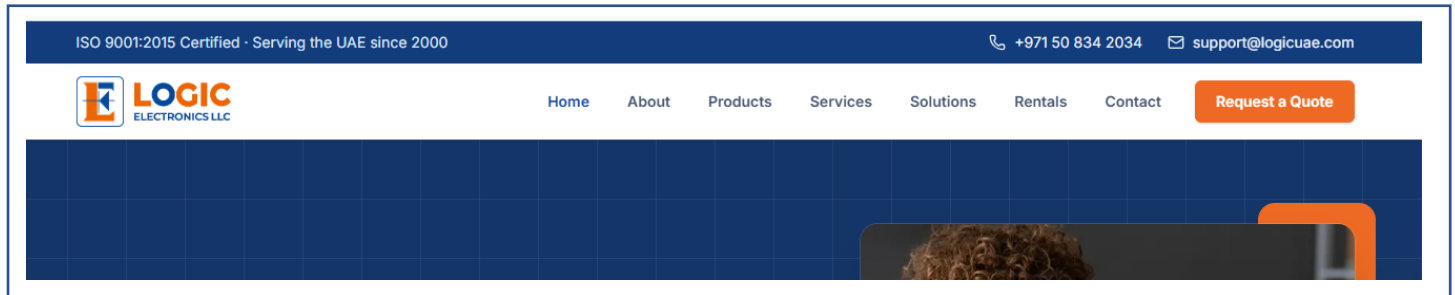

The navbar should better represent the full scope of our business, covering both Printer Solutions and IT Products & Services. The current navigation is too limited and does not sufficiently communicate the range of products and services we offer.

We suggest a **center-aligned** navigation menu with categorized dropdown/**mega-menu** options.

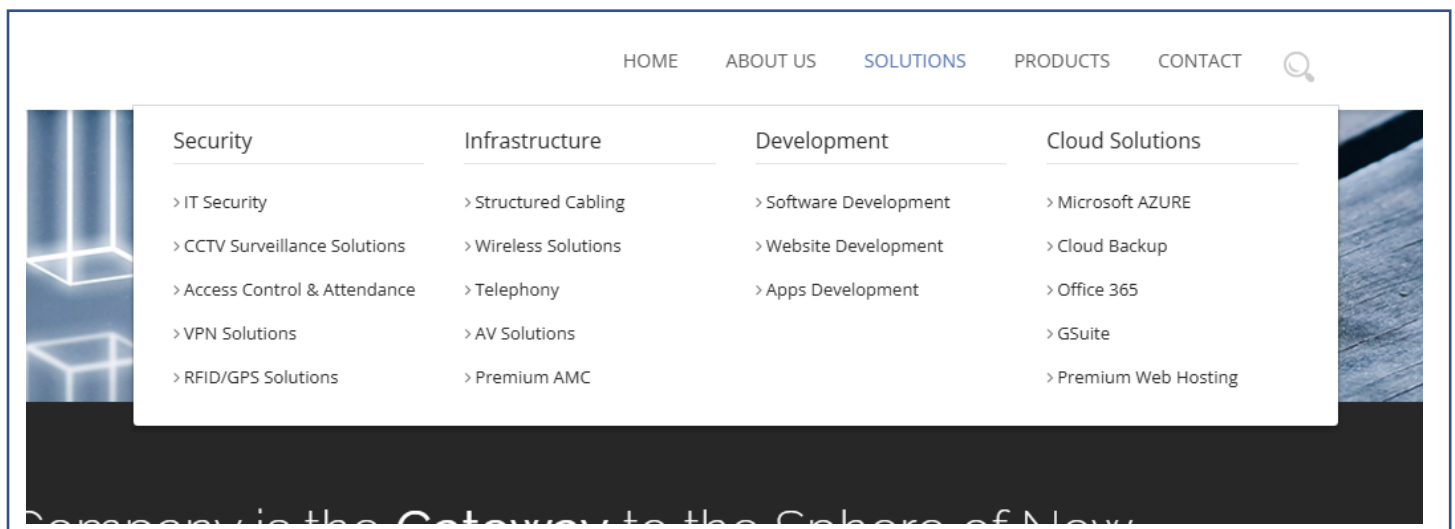

The dropdowns should be visually organized into logical groups rather than presented as a long list. This will make the navigation easier to understand while still giving the impression of a company with a **broad range of products and technical capabilities**.

Recommended Navigation Structure

[Logo] [Home] – [About Us] – [Products] – [Services] – [Solutions] – [Rentals] – [Contact] [Quote Btn]

**this is just a mock-up. In deployment centre align the nav links*

**use this style of mega menu*

2. HERO SECTION

REQUIRED REVISION

The hero section should be redesigned to provide a stronger and more immediate representation of Logic Electronics as a complete Printer, Office Equipment, IT Products, and Technical Services provider.

The current hero copy feels more like an “**About Us**” introduction rather than a strong landing-page hero. The new section should be shorter, more engaging, and focused on our range of solutions and UAE-wide reach.

2.1 Dynamic Hero Section

As suggested, a dynamic hero section: the layout and CTA position stay fixed, while the headline, supporting text, and image rotate through 3 states.

State 1 – Printers & Copiers

Printers • Copiers • Scanners • Consumables • New & Refurbished • Repairs • AMC • Rentals • Leasing

State 2 – IT Hardware & Support Solutions

Computers • Laptops • PC Components • Monitors • Storage & RAM • Networking • Custom PC Builds • IT Equipment

State 3 – try to showcase all major services in this slide – a visual overview of what the company does.

Each state could have a respective **CTA** relevant to the state’s content.

2.2 Service Grid

✓ Annual Maintenance	✓ 24/7 Support	✓ Remote Help Desk	✓ On Site Support
✓ Free Pickup & Delivery	✓ Rental Facility	✓ Office Shifting Facility	✓ Office Equipment & Stationery

The existing 2×4 services grid should not remain at the bottom of the hero section as these items currently fall below the initial viewport, visitors do not see them without scrolling and can be easily missed.

Recommended: place them under the next section as a sliding ribbon (right below the 26+ years section). These could be displayed as an **animated ribbon**, moving horizontally.

3. HOME PAGE

The following changes are recommended:

3.1 “What We Do” & “Expertise” Sections

Swap the sections

FIVE AREAS OF EXPERTISE

Everything your business needs, from one partner

Each area is run by specialists, but you still deal with one team, one contract and one point of contact.

01

Printing & Copier Solutions

Sales, rental, repair and consumables for every major copier and printer brand in the UAE.

Browse services →

02

IT Infrastructure & Support

Managed IT, datacenter, networking, security and backup services that keep your business running.

Browse services →

03

Security & Communication

CCTV, access control and unified communication systems for offices and facilities.

Browse services →

04

Digital Solutions

Websites, digital marketing and design that put your business in front of the right customers.

Browse services →

05

Office Supplies & Equipment

Stationery, electronics and genuine spare parts delivered to your door across the Emirates.

Browse services →

**This section should appear first*

3.2 Add a rental section in Home Page (Below “What we do” section).

A one-line ribbon gallery of printer/copier photos

Types of rental and amc contracts briefly explained, highlighting benefits.

SOS offers Rental services for Printers and Copiers.

For your short-term document production needs, rely on SOS's products and services.

SOS Short Term Rental is the most straightforward option for renting a printer and copier when you have to create documents for special occasions or to satisfy urgent requests for high-volume document creation. Make us your go-to source for document solutions; we offer a cutting-edge selection of office supplies and provide a "total package," so whether your event is held on-site or off, for as little as three days or as long as a year, let our committed, knowledgeable staff make sure everything goes without a hitch. Whether your event is across the hall or in the UAE, we have the office supplies, goods, and assistance you need to make it memorable.

Copier and Printer Rentals for:

✓ Meetings, conferences, seminars, commercial exhibitions, and athletic activities

✓ Peak times for increased activity, such as year-end reporting, tax season, litigation, and audits

✓ Short-term requirements for engineering projects, construction sales offices, and movie productions

reference: sosa.uh.com

3.3 Brands Section

The logos should be displayed in their **original/brand colors by default**. Change to a horizontal continuous sliding ribbon animation. Include software brands.

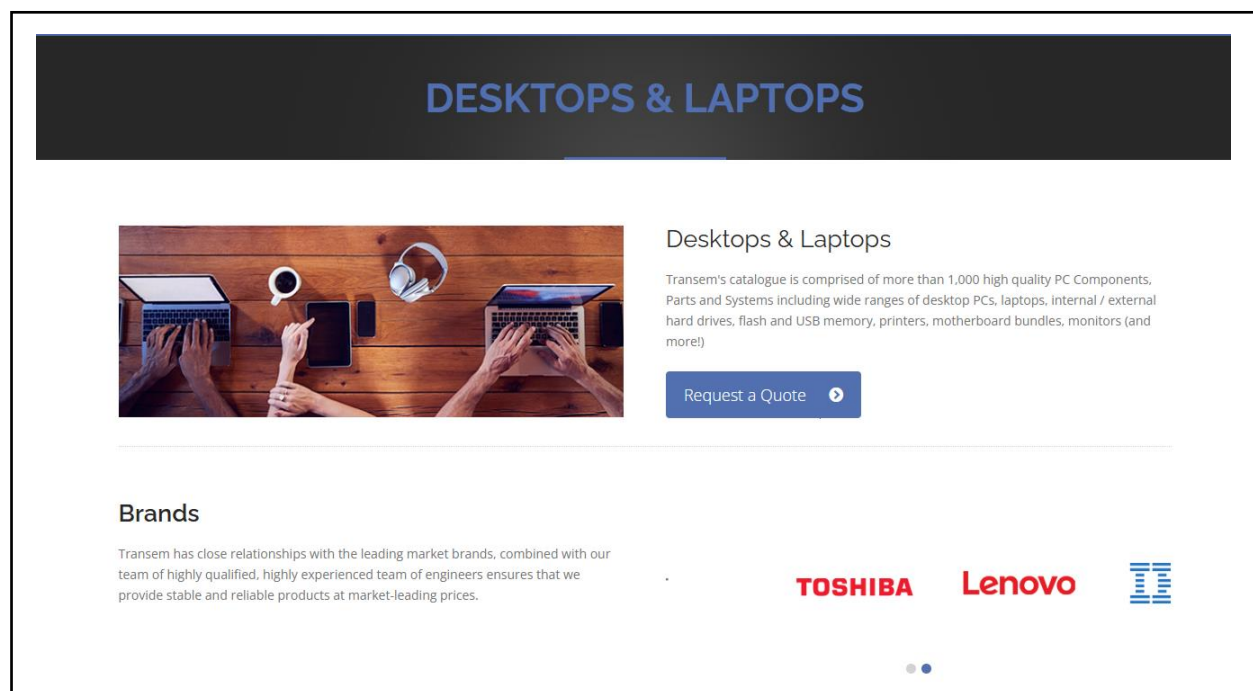

3.4 Add a “Our Trusted Clients” section: Displaying our more prestigious clients (logos)

We will provide the Logos. Same animation as the brands section, maybe a different style.

4. Child Pages Content & Structure

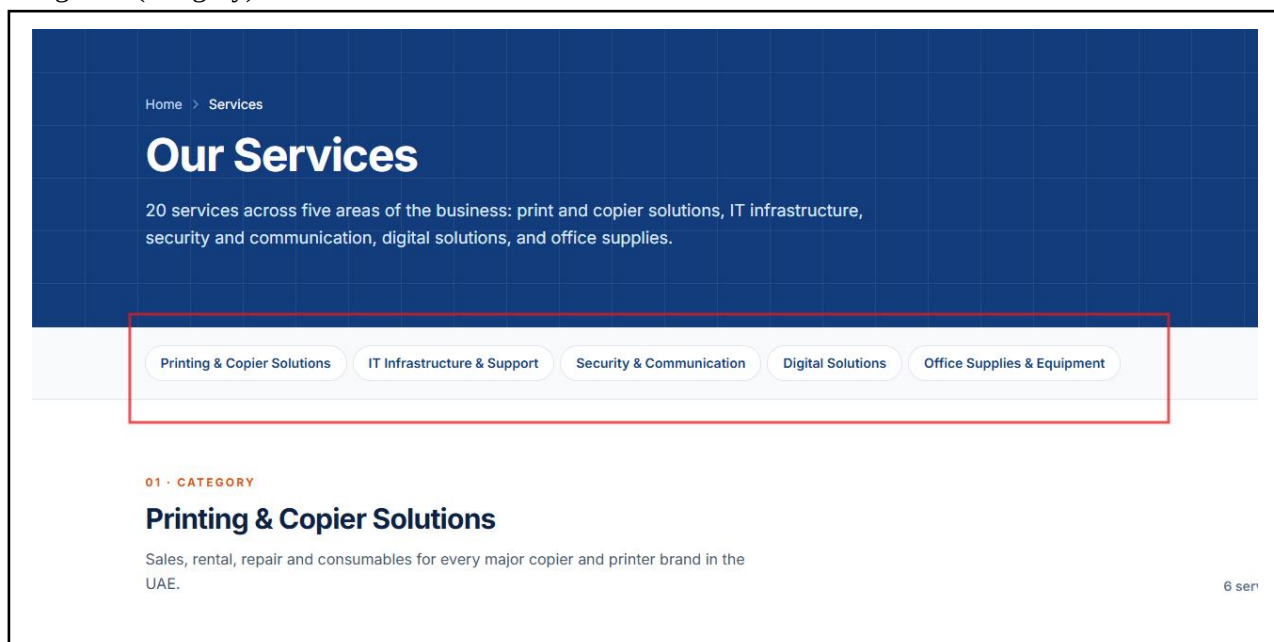

4.1 Brand Logo Placing

Place relevant logos in each page

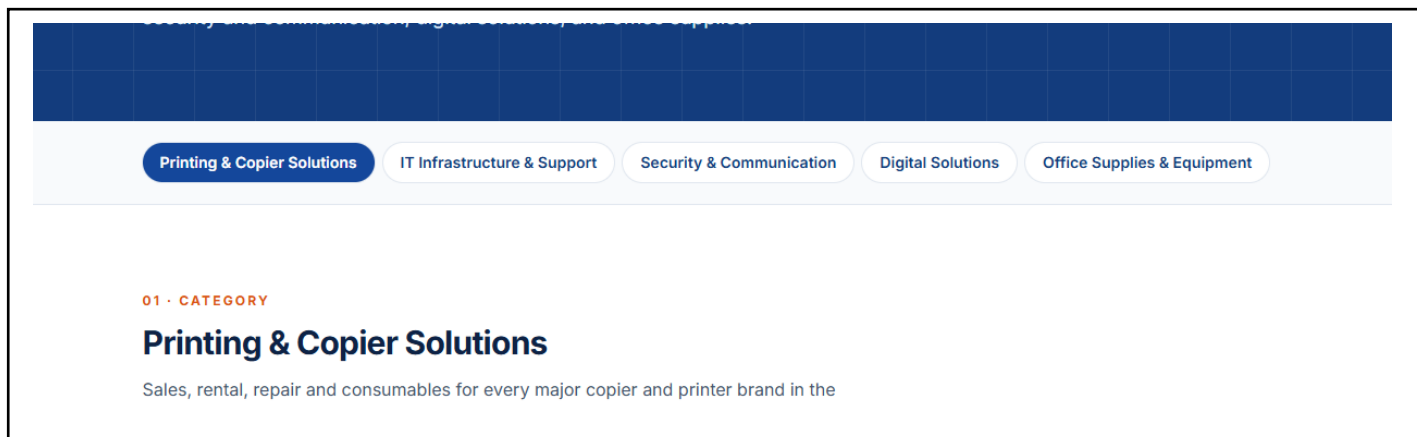

4.2 Navigation Buttons on Service page

The navigation (category) buttons doesn't feel like interactive button.

Maybe a default select on the Printing and Copier Solutions or any other design elements that would make the buttons pop a bit more is preferred.

4.3 Overall Content Direction

Across the website, the content should be:

- **Straightforward and customer-focused**
- Easy to scan rather than paragraph-heavy
- Focused on **what we sell, what we provide, and what we can do** – More personal and connected to our company.
- Supported by clear CTAs such as **Request a Quote, Contact Us, Explore Services, or Enquire Now.**

The development team should have flexibility in determining the final layout and presentation, but the website should consistently communicate that **Logic Electronics provides a broad range of printer, IT, office equipment, rental, and technical solutions across the UAE.**

Prepared By: **Logic Electronics**
